

KITCHEN PLANNER

info@azulekitchens.ca 905-664-1112

At Azule Kitchens we understand that your kitchen is the heart of your home and that no two kitchens are the same. We offer a complete line of quality cabinetry that is designed and tailored to your unique individual needs. We are focused on designing our customers a kitchen space that

is fully functional, efficient and beautiful! We want to ensure your new kitchen project is everything you've ever dreamed of while making your experience easy and enjoyable.

START HERE: Take a brief look at the 3 pages in this package. Start by following the example provided below. Draw your kitchen room layout on page 2 and continue to page 3. (If you require additional pages please use page 2 again or attach your own) Our kitchen planner helps excel the process for you and your kitchen designer. We will use these measurements and information to design and show you your new kitchen space on our top of the line 3-Dimensional design software in full colour and detail.

- All measurements in **inches**. Follow sample layout.
- Start by measuring your sink window wall first. Measure from the corner or the wall and measure to the outside edge of any window or door trim. Label windows and doors.
- Measure total length of walls corner to corner.
- Indicate centre of sink, doors, windows, sink center, electrical, water, drainage & gas locations.
- Measure windows and doors from the outside of trim to outside of trim.
- Indicate direction of all door swings.
- Measure room height. Indicate any drop ceilings or bulkheads with dimensions if they are staying.
- Indicate appliance locations on the diagram & insert appliance sizes in the area provided on page 3.
- For complex layouts and floor plans please use a simple labeling legend. (Example: 'A' = water line)
- Indicate what you would like above stove/range. Decorative hood, under cabinet exhaust, microwave, etc.
- Double check all measurements. Providing pictures of your space and your ideas helps your designer visualize your space.
